What we DO?

The aim of the program is to assist children to grow holistically (body, soul and spirit) and to enable the child to see themselves as an important component of their community and South Africa. Children have a role to play in building their local communities as role models for other children and also as leaders for the future.

We target specifically however not exclusively children who are orphaned or vulnerable through life experiences. Currently we have over 2,000 children meeting together on a weekly basis through out Greater Tzaneen in 50 different villages.

We also work with the parents of the children, to train the parents in parenting skills and how to identify a child in crisis and what to do to help. The parents become engaged with the children, they support and reinforce the work we do with the children also in the process are able to bring about substantial positive change within the Families.

Finally, we work with community members, particularly Induna's to provide a platform for children to express their concerns within their communities and to have a voice when there are youth related problems.

Who are WE?

Keep The Dream196 is a Children's Rights Based Non Governmental Organization based in Mopani District that has been operating essentially since 2003 in Greater Tzaneen. We have a passion for children and to see children become all they dream they can be.

Primarily we work through Community Based Organizations training their Caregivers to support all children within their communities with a myriad of skills and practical support.

The children are invited to join our life skills development program, which is based on Scouts. The program starts at the age of 5yrs and continues for life.

The program offers age appropriate skills, personal and interpersonal skills development including leadership, team building , self-esteem and resilience promotion.
